PROFILE

Data Engineer with 4+ years of experience building cloud-native ETL pipelines using AWS Glue, PySpark, Lambda, Athena, and S3. Skilled in developing scalable data processing and automation solutions, transforming 50+ GB benchmarking datasets into actionable insights through data warehousing, analytics, and visualization. Improved operational efficiency by 80% through event-driven AWS architectures.

TECHNICAL SKILLS

- **Data Engineering:** ETL Pipelines, PySpark, Data Warehousing, DataOps, Hadoop
- **Cloud Platforms:** AWS (Glue, S3, Lambda, Athena, SQS, QuickSight, EC2, Kendra), IAM, CloudWatch
- **Programming & Development:** Python, Java, Flask, Django, Shell Script, HTML5/CSS3, Jinja
- **Database Management:** SQL, MySQL, Oracle, MongoDB, SybaseIQ
- **Automation & DevOps:** CI/CD Pipelines, GitHub Actions, Jenkins, AWS CodePipeline, Git
- **Tools:** Visual Studio Code, PyCharm, IntelliJ, Jira

EXPERIENCE

Lead Data Engineer, Persistent Systems

2022 – Present | Pune, India

AWS Data Benchmarking & ETL Automation Platform

Pipeline: EC2 → S3 → SQS → Lambda → Glue(PySpark) → Athena → QuickSight

- Designed and implemented cloud-native **ETL pipelines** using **AWS Glue, PySpark, Lambda, Athena, and S3** to process **50+ GB benchmarking datasets**.
- Built event-driven workflows integrating **EC2, S3, SQS, and Lambda** to automate vulnerability benchmarking and data ingestion processes.
- Developed **Python** automation frameworks to parse, normalize, and transform tool outputs into structured **JSON datasets** for analytics.
- Optimized **Athena SQL** queries and dataset organization to improve benchmarking report generation and analytical performance.
- Implemented **data validation, monitoring, retry mechanisms, IAM security controls, and CloudWatch logging** for reliable pipeline execution.
- Built **QuickSight dashboards** providing benchmarking insights, **TP/FP/TN/FN metrics**, and comparative tool performance analysis.
- Improved operational efficiency by approximately **80%** through workflow automation and scheduled **EC2 orchestration**.

Senior Software Engineer, Persistent Systems

2021 – 2022 | Pune, India

Data Pipeline Development (StreamSets)

- Developed and supported **data ingestion and transformation pipelines** using **StreamSets** for enterprise data processing workflows.
- Integrated **PySpark** transformations and optimized pipeline orchestration, monitoring, and workflow reliability.
- Leveraged **DataOps, AWS Glue**, and custom **Python**-based automation to streamline large-scale data processing operations.

AWARDS AND CERTIFICATIONS

- **Top Talent FY2025** – Recognized for ingenuity, persistence, and high-quality delivery.
- **Bravo Award (2026)** – Recognized for end-to-end ownership of CDK infrastructure and benchmarking automation, driving successful project delivery.
- **Bravo Award (2024)** – Recognized for leadership in AWS re:Invent activities and team enablement.
- **High Five Award (2024)** – Honored for exceptional programming skills and independent ownership of benchmarking automation.

- **Certifications:** AWS Certified Cloud Practitioner, Google IT Automation with Python, HackerRank Silver Badge (Python).

EDUCATION

- **Vidhya Pratishthan's Kamalnayan Bajaj Institute of Technology** 2017-2021
Bachelor of Engineering in Computer Science (CGPA: 8.43/10)
